Jeová Farias Sales Rocha Neto

Visual Arts Center 308, Bowdoin College, Zip Code: 04011 – Brunswick – ME
+1 631 538 8982 • j.farias@bowdoin.edu • jeovafarias.github.io • linkedin.com/in/jeova-farias

Education

Brown University **Providence, RI • 2016 – 2021**

- PhD. in Computer Engineering, MSc. in Applied Mathematics (*GPA: 4.0*)
- *Research Focus:* Discrete Optimization for Image Segmentation and Clustering.
- *Adviser:* Pedro F. Felzenszwalb.

University of Nice-Sophia Antipolis **Sophia-Antipolis, France • 2014 – 2015**

- MSc. in Computer Science, *with Honors*
- *Research Focus:* Shape descriptors, 3D mesh indexing and retrieval.
- *Supervisor:* Marc Antonini.

Federal University of Ceará **Fortaleza, Brazil • 2011 – 2015**

- BEng. in Telematics Engineering, *Magna cum Laude*
- *Research Focus:* Statistical Parameter Estimation, Level-Set-based image segmentation, SAR and Biomedical Imagery.
- *Supervisor:* Fátima N. Sombra de Medeiros.

Work Experience

Computer Science Department at Bowdoin College, Assistant Professor **Brunswick, ME • 2023 –**

Computer Science Department at Haverford College, Visiting Assistant Professor **Haverford, PA • 2021 – 2023**

Laboratory for Engineering Man/Machine Systems (LEMS), Research Assistant **Providence, RI • 2016 – 2021**

Informatics, Signals and Systems Laboratory (I3S), Research Assistant **Sophia Antipolis, France • 2014 – 2015**

Vision, Images and Signals Laboratory (LABVIS), Research Assistant **Fortaleza, Brazil • 2013 – 2016**

Teaching & Advising Experience

Teaching

Deep Learning for Computer Vision (CS3485), Main Instructor **Bowdoin • Fall 2023, Spring 2025, Spring 2026**

Introduction to Computer Science (CS1101), Co-instructor **Bowdoin • Spring 2024**

Artificial Intelligence (CS2400), Instructor **Bowdoin • Fall 2024, Spring & Fall 2025**

Deep Learning for Computer Vision (CS396), Main Instructor and Course Designer **Haverford • Fall 2022**

- Designed to cover the most recent Deep Learning solutions to Computer Vision, going from image classification, object detection, segmentation, denoising and image generation. • Fully designed in PyTorch with accompanying explanatory IPython notebooks.

Data Structures (CS106), Main Instructor and Course Designer **Haverford • Spring 2022-2023**

- Designed in Java, it covered Object Oriented Programming the the traditional data structures (lists, queues, stacks, graphs, hashing, etc.). • The course received praise from the department and students.

Machine Learning (CS360), Co-Instructor **Haverford • Spring 2022**

Introduction to Computer Science (CS105), Main Instructor **Haverford • Fall 2021-2022**

- Designed in Python, the foundations of computer science to students without prior experience in programming • Covered variables, conditional statements, loops, file management, exception handling and Numpy.

Foundations of Data Science (CS260), Co-Instructor **Haverford • Fall 2021**

Artificial Intelligence and Deep Learning, Instructor and Course Designer **Brown • Summer 2019**

- Designed and taught course on Deep Learning entirely designed to high-schoolers with none or very little background on Calculus and Algebra • The class had a duration of 60h and included homeworks and class assignments on Jupyter/IPython.

Introduction to Matlab, Instructor and Course Designer **Federal University of Ceará • Jan – Feb 2013**

- Short course (16 h) on Matlab basics and its applications in engineering • The course content and materials, which included a 90-page long Matlab tutorial in Portuguese written in LaTeX(link to download), were compiled by me specially for this class.

Linear Systems (ENGN 1570), Teaching Assistant **Brown University • Fall 2020**

Machine Learning and Pattern Recognition (ENGN 2520), Teaching Assistant **Brown University • Spring, 2019**

Research Advising and Metoring

Undergraduate and Masters Research Projects, Research Advisor

- Karim ElSedfy — Bowdoin College • Fall 2025
  Exploring the Use of YOLO Networks for image Segmentation
- Zai Yang — Bowdoin College • Fall 2025
  Connecting GeLU and SiLU activation Function using an fast arctangent-based activation
- Joram Kim — Bowdoin College • Summer-Fall 2025
  Implicit Neural Representations for Model Interpretability and Unsupervised Image Segmentation
- Shahd Hekal — Bowdoin College • Summer-Fall 2025
  JaSIN: A Self-Regularized ReLU Variant for High-Performance Image Reconstruction via Implicit Neural Representations
- Richard Lim — Bowdoin College • Summer-Fall 2025
  A Language Model for Expressiveness in American Sign Language
- Vaishali Miriyagalla — Bowdoin College • Spring 2025
  Data Analysis and Computer Vision on Squash Games
- Abhi Nagireddygari — Bowdoin College • Fall 2024 – Spring 2025
  Data Analysis and Computer Vision on Squash Games
- Alexander Richardson — Bowdoin College • Fall 2024 – Spring 2025
  Spectral Attention by Unrolling Principal Component Analysis
- Brian Liu — Bowdoin College • Fall 2024 – Spring 2025
  Measuring Multidimensiona Poverty from Satellite Data and Points of Interest
- Louisa Linkas — Bowdoin College • Summer 2024
  Understand the Impact of Climate Change on Costal Maine Using Satellite Data
- Justas Bardauskas — Bowdoin College • Summer 2024
  Design a Software to Efficiently Scrape and Strore Satellite Images and Points of Interest
- Ulemj Munkhtur — Bowdoin College • Summer 2024
  Clustering Data using Unsupervised Deep Neural Networks
- Mingi Kang — Bowdoin College • Summer 2024 - Spring 2026
  ConvNN: Attention via Convolutional Nearest Neighbors
- Kavi Sarna — Bowdoin College • Spring 2024 – Spring 2025
  Generalized Squeeze-and-Excitation Networks
- Jack Roberts — Bowdoin College • Spring 2024 – Spring 2025
  Studying the Effect of Adding Superpixel Information to the U-Net for Image Segmentation.
- Ben Bockman — Bowdoin College • Spring 2024 – Summer 2025 - Spring 2025
  CNNs for Predicting Poverty Rates using Satellite Imagery.
- Yonas Gebregziabher — Bowdoin College • Spring 2024
  Creating an Online Environment to Teach Deep Learning on the Google Cloud Platform.
- William Warlick — Bowdoin College • Spring 2024
  Measuring Shot Put Distances using 3D vision.
- Wahub Ahmed — Haverford College • Spring 2024
  Using the Information Theoretic Bottleneck Principle in GANs.
- Olivia Wirsching — Bowdoin College • Fall 2023
  GANs for Art Restoration.
- Cassandra Goldberg — Bowdoin College • Fall 2023 – Spring 2024
  Statically sound Deep Learning Approaches to SAR Image Segmentation.
- Ahmed Haj and Mohammad Fanous — Haverford College • Summer 2022
  Majorization-Minimization for Superpixel-based Unsupervised Image Segmentation.
- Issac Wasserman — Haverford College • Fall 2022 – Spring 2023
  Patch-based Deep Unsupervised Image Segmentation with Graph Cuts.

- Dylan Soemitro — Haveford College • Fall 2022 – Spring 2023
  A Novel Spectral Clustering Algorithm for Mixed/Heterogeneous Data.
- Yiting Zou — Haveford College • Fall 2022 – Spring 2023
  Using Topic Modeling Strategies for Image Segmentation.
- Sam Silverman, Julia Curran and Angelina Geralis — Haveford College • Fall 2022 – Spring 2023
  Using Data Science to Predict Soccer Matches Outcomes and Player Performance.
- Li Fan — Haveford College • Fall 2022 – Spring 2023
  Parameter Estimation for the $\mathcal{G}_I^0$ Distribution Using Deep Learning.
- Joseph Tadrous — Haveford College • Fall 2022
  Literature Review on Deep Learning Methods For Semantic Image Segmentation.
- Adiel Benisty — Haveford College • Summer, 2022
  Derivative-free Optimization with Graph-Cuts.
- Ivy Xie and Ellie Hughes — Haveford College • Summer, 2022
  Literature Review on Deep Learning Methods For Saliency Detection.
- Olufemi Obiwumi — Haveford College • Spring, 2022
  Estimating Coherent Appearance Models for Segmentation using Non-Negative Matrix Factorization.
- Jacob Zimmerman — Haverford College • Fall, 2021 – Spring, 2022
  Global Modeling for Noise2void-Based Deep Unsupervised Image Restoration.
- Rahul Palnitkar — Haverford College • Fall, 2021 – Spring, 2022
  New Sparse Graphs with Global Modeling for Spectral Image Segmentation.
- Frederick Gould — Haverford College • Fall, 2021 – Spring, 2022
  Graph-cut based K-means formulation for Image Segmentation.
- Keeton Martin — Haverford College • Fall, 2021
  Using Deep Learning to Estimate Item Response Theory Parameters.
- Iryna Khovryak — Haverford College • Fall, 2021
  Leveraging Graph Structure in Fundus Images for Blood Vessel Segmentation using Graph Neural Networks.
- Pedro Polanco — Brown University • Summer, 2020 – Spring, 2021
  Unsupervised Deep Image Segmentation with Gaussian Processes.

Direct Reading Program in Applied Math, Mentor — **Brown University • Spring, 2019 – Fall, 2020**

- Advised undergraduate research projects on topics related to the mathematical foundations of Deep Learning. The project titles were: "The Mathematics of Deep Learning" (Fall 2019), "Explaining Deep Learning with Kernel Machines " (Spring 2020) and "S.L.O.G.A.N. – Sane Learning of Generative Adversarial Networks" (Fall 2020)

.

Other

The Sheridan Teaching Seminars, Certified Participant — **Brown University • 2020 – 2021**

- Received teaching certificates on Reflective Teaching (I) and Course Design (II) from Brown's Sheridan Center for Teaching and Learning. These intensive programs certificates recognize one's ability to develop their teaching practice in order to support diverse learners (I), while developing professional and inclusive courses' syllabi (II).

Pre Doctorate Mentorship Program, Mentor — **Brazilian Student Association (BRASA) • Mar – Dec, 2020**

- Mentored Brazilian undergraduate students applying to PhD programs in the USA.

Publications

Below, co-authors whose main contributions took place as undergraduate students are in *italics* and co-authors whom I advised at Bowdoin are underlined.

Preprint

[18] *Mingi Kang* and **J. F. S. R. Neto**, *Attention via convolutional nearest neighbors*, 2025. arXiv: 2511.14137.

Memberships

- Sigma Xi Scientific Research Honor Society (*Associate Member*, earned by nomination) Jun, 2019 –
- Society for Industrial and Applied Mathematics - SIAM Jan, 2019 –
- Institute of Electrical and Electronics Engineers - IEEE May, 2025 –

Academic Organization / Participation

- Undergraduate Workshop on Scientific Writing (*Organizer*) Oct, 2013 • Mar, 2014 • Oct 2014 • Oct, 2015
- Probabilistic Scientific Computing Workshop at ICERM (*Attendee*) Jun, 2017
- Real Algebraic Geometry and Optimization (*Attendee*) Oct, 2017
- Computer Vision Semester Program at ICERM (*Co-organizer* and *Attendee*) Spring, 2019
- Bowdoin CS Faculty Hiring Committee (*Committee Member*) Fall, 2023 –
- Bowdoin's Curriculum and Educational Policy Committee (*Committee Member*) Sept, 2025 –
- Bowdoin's "The Power of the Liberal Arts and Interdisciplinary Learning" Panel (*Panelist*) Oct, 2025
- Bowdoin's Generative AI/Vibe Coding Hackathon (*Co-organizer*) Oct, 2025
- Bowdoin's Hastings AI Workshop (*Co-organizer* and *Presenter*) Jan, 2026

Other

- Applied Math/ICERM Machine Learning Journal Club (*Co-organizer*) Jan, 2019 – Mar, 2020
- 2021 Brazil Conference at Harvard & MIT (*Staff Member and Co-organizer*) Oct, 2020 – Jun, 2021

Awards

Prizes

- Sigma Xi Prize (excellence in research in Electrical Sciences and Computer Engineering at Brown University) 2018
- Best Paper Award at 2025 International Conference on Computer Vision Theory and Applications (VISAPP) 2025
- Best Paper Award Runnerup at IEEE 37th Conference on Graphics, Patterns and Images (SIBGRAPI) 2024
- 3rd Place Best Poster Award at 2025 Connecticut Sports Analytics Symposium (CSAS) 2025

Scholarships and Grants

- Brown University's School of Engineering Graduate Fellowship 2016 – 2021
- BRAFITEC (*Brésil-France Ingénierie et Technologie*) Full Scholarship for Masters studies in France 2014 – 2015
- CNPq (Brazilian National Agency for Scientific Research, in Portuguese) Research Grant 2013 – 2014

Academic Olympiads

- Brazilian National Olympiad of Physics 2008, 2009, 2010 (Bronze Medal).
- Brazilian National Olympiad of Informatics 2009 (Bronze Medal).
- Brazilian National Olympiad of Astronomy 2007, 2008 (Gold medal); 2006, 2009 (Silver medal).
- Brazilian National Olympiad of Robotics 2007 (Bronze medal).

Skills

Languages: Portuguese (*Mother Tongue*), English (*TOEFL Score: 109*), French (*Professional Working Proficiency*)

Technical: Matlab, Python (*Numpy, Scikit-Learn, Keras, TensorFlow, PyTorch*), Java, C++ (*OpenCV*), Git, LaTeX/ *Beamer*
